

Parent Training on Behavior Therapy

For Children within the Autism Spectrum Disorders

The guest speaker will be a
Board Certified Behavior Analyst with Butterfly Effects

Behavior analysts focus attention on reducing behavioral excesses, such as tantrum behavior and hyperactivity, while addressing skill deficits like self-help/motor-skills, social skills, theory of mind, language, and play domains. Behavior Therapy is especially effective for children on the Autism Spectrum. Find out more about how to help your child with behavior therapy.

12 March 2013

1000 – 1200
