

Root Cause Analysis (RCA) Status - FY 2010 Red Performance Results

Task No.	Metric	RCA Complete?
1-2.3	Percent of subwatersheds for which current watershed management plans are in place	Yes
2-2.1	Percent of potential Red-cockaded Woodpecker (RCW) habitat acres (pine and pine-hardwood stands) for Fort Polk, Peason Ridge, Intensive Use Area (IUA) and Limited Use Area (LUA) that have been cruised for stand inventory within the 10-year entry cycle.	No
2-2.2	Percent of pine and pine-hardwood forest acres that have received prescribed fire treatment within the 3 year target burning cycle.	Yes
2-2.3	Percent of cumulative IUA sale inventory and thinning goals accomplished, based on cumulative acres inventoried and sold.	No
2-2.4	Percent of potential RCW habitat required to support the Vernon-Fort Polk and Peason Ridge RCW populations at recovery that is currently available.	N/A; RCA deferred pending completion of Endangered Species Management Component of Fort Polk Integrated Natural Resource Management Plan
4-1.6	Estimated rate of change in percent of total annual hunting acre-day capacity that is open for hunting ("percent open for hunting") over the past five year period, reported by area (LUA, Fort Polk and Peason WMAs). Annual training utilization rate, by area.	Yes*
5-1.4	SEMP Oversight Committee reviews conducted at least once per quarter.	Yes
5-2.2	Percent of SEMP monitoring questions for which one or more metrics and associated performance target criteria have been approved by the Oversight Committee.	Yes
Percent of Required FY 2010 RCAs completed during FY11		6 / 7 = 85%

*RCA completed for FY10 and FY11 annual results.
